## soakin' in the summer SUN

### i know... what you did last summer

I spent my summer vacation working with my sister's band. We traveled all over the state and had the chance to play for a lot of different groups of people.

**win**

Working with special needs students really helped me appreciate what I have. It was so amazing to spend my summer helping others...I used to spend the time focused on my own needs.

**lose**

Love everyone still, but this summer was a little different. I spent a lot of time at work and my friends were all going to college. It was a little sad, but I know they'll be back soon.

**MOUNTAIN HIGH**

For those who want to spend time in the mountains, Mountain High is the perfect place. The resort offers a variety of activities for everyone, from hiking to skiing. It's a great place to spend your summer.

**All In The Family** –For a clean, consistent look, more staffs are moving towards the use of one or two fonts throughout the entire yearbook as a way to create personality with style. More attention is given to the design of typographic elements than the relying on a change of face–typeface. Study this design using variations of Helvetica and you will note the contrast of not only face, but also size, density, capitalization, color and leading.
